

PPGI Manual – Circle

This type of roller shutter is the most common. The operation is manual-push up the shutter for opening and pull down for closing. The counter balance springs in the drum help to carry the weight during operation.

Typical Application: Shop houses, Departmental Stall, Banks and Commercial Entrances.

PPGI Manual – Square

This type of roller shutter is the most common. The operation is manual-push up the shutter for opening and pull down for closing. The counter balance springs in the drum help to carry the weight during operation.

Typical Application: Shop houses, Departmental Stall, Banks and Commercial Entrances.
